WINSTON RESOURCES INC. Condensed Interim Financial Statements For the Three Months Ended October 31, 2019 and 2018

> (EXPRESSED IN CANADIAN DOLLARS) (UNAUDITED)

NOTICE OF NO AUDITOR REVIEW OF INTERIM FINANCIAL STATEMENTS

Under National Instrument 51-102, Part 4, subsection 4.3 (3)(a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that the interim financial statements have not been reviewed by an auditor.

The accompanying unaudited condensed interim financial statements of the Company have been prepared by and are the responsibility of the Company's management.

The Company's independent auditor has not performed a review of these condensed interim financial statements in accordance with standards established by the Chartered Professional Accountant of Canada for review of interim financial statements by an entity's auditor.

Winston Resources Inc. Notes to Condensed Interim Financial Statements For the Three Months Ended October 31, 2019 and 2018 (Expressed in Canadian Dollars) (Unaudited)

1. Nature of Operations

Winston Resources Inc. ("Winston" or the "Company") is incorporated under the laws of the province of British Columbia. Winston was an exploration stage company engaged in the acquisition and exploration of mineral resource properties in Canada. Prior to January 29, 2016, the Company also invested in four other companies operating in the Canadian resource sector as well as a United States based company providing management services to Canadian based mineral exploration companies. On January 29, 2016, the Company distributed to its shareholders all its interest in CNRP Mining Inc. ("CNRP"), Zara Resources Inc. ("Zara"), Leo Resources Inc. ("Leo") and Hadley Mining Inc. ("Hadley") and no longer has any interest in these companies. As of July 31, 2017, the Company is changing its business from natural resources to the cannabis sector.

Effective May 31, 2017, the Company entered into a definitive agreement (the "Share Exchange Agreement") with GT Therapeutics Corporation ("GTT"), pursuant to which the Company will complete a reverse takeover and acquire from the shareholders of GTT, all of the issued and outstanding shares of GTT, causing GTT to become a wholly-owned subsidiary of Winston.

Effective on January 10, 2018, the Company entered into an assignment and novation agreement (the "Assignment Agreement") among the Company, certain shareholders of GTT and Abattis Bioceuticals Corp. ("Abattis"), a company listed on the Canadian Securities Exchange ("CSE"), pursuant to which, the Company assigned all of its rights and interest (the "Assignment") with GTT. On January 29, 2018, the Company's assignee, Abattis, completed its acquisition of GTT (note 9).

Winston is a reporting issuer in the jurisdictions of British Columbia, Alberta and Ontario whose common shares are listed for trading on the CSE under the symbol "WRW". The head office of the Company is located at 400 - 837 West Hastings St., Vancouver, BC, V6C 3N6, Canada.

2. Going Concern Assumption

These condensed interim financial statements have been prepared on the basis of accounting principles applicable to a going concern under International Financial Reporting Standards ("IFRS"). The use of these principles under IFRS assumes that the Company will continue in operation for the foreseeable future and will be able to realize assets and discharge its liabilities in the normal course of operations. The Company continues to incur operating losses, which casts significant doubt about the Company's ability to continue as a going concern.

Management's current strategy is careful cost control while pursuing opportunities within various market sectors. Management recognizes the Company's need to increase its cash reserves in the coming year if it intends to adhere to its plans and has evaluated its potential sources of funds. Although management intends to assess and act on these options throughout the course of the year, there can be no assurance that the steps management take will be successful.

In the event that cash flow from operations, together with the proceeds from any future financings are insufficient to cover planned expenditures, management will allocate available resources in such manner as deemed to be in the Company's best interest. This may result in a significant reduction in the scope of existing and planned operations.

As at October 31, 2019, the Company has not generated any revenues from operations and has a deficit of \$13,610,638 (July 31, 2019 - \$13,525,372). The Company is actively seeking additional sources of financing. In assessing whether the going concern assumption is appropriate, management takes into account all available information about the future, which is at least, but not limited to, twelve months from the end of the reporting period. Management is aware, in making its assessment, of uncertainties related to events or conditions that may cast significant doubt upon its ability to continue as a going concern that these uncertainties are material and, therefore, that it may be unable to realize its assets and discharge its liabilities in the normal course of business.

Accordingly, these condensed interim financial statements do not give effect to adjustments that would be necessary should the Company be unable to continue as a going concern and therefore to realize its assets and discharge its liabilities and commitments in other than the normal course of business and at amounts different from those in the accompanying condensed interim financial statements. These adjustments could be material.

3. Statement of Compliance and Basis of Presentation

(a) Statement of compliance

The unaudited condensed interim financial statements are prepared in accordance with International Accounting Standard 34, Interim Financial Reporting. Accordingly, they do not include all of the information required for full annual financial statements required by IFRS as issued by the International Accounting Standards Board ("IASB"). The board of directors approved the condensed interim financial statements on December 19, 2019.

These condensed interim financial statements follow the same accounting policies and methods of their application as the most recent annual financial statements and should be read in conjunction with the Company's audited financial statements for the year ended July 31, 2019.

(b) Basis of presentation

These condensed interim financial statements have been prepared on a going concern basis, under the historical cost convention, except for certain financial instruments which may be carried at fair value and have been prepared using the accrual basis of accounting, except for cash flow information.

4. Significant Accounting Policies

These condensed interim financial statements have been prepared by management in accordance with IFRS and IFRIC. Outlined below are those policies considered particularly significant:

Use of estimates and judgments

The preparation of financial statements in accordance with IFRS requires the Company to make estimates and assumptions concerning the future. The Company's management reviews these estimates and underlying assumptions on an ongoing basis, based on experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances. Revisions to estimates are adjusted for prospectively in the period in which the estimates are revised.

Estimates and assumptions where there is significant risk of material adjustments to assets and liabilities in future accounting periods include the fair value measurements for financial instruments and, the recoverability and measurement of deferred tax assets.

The preparation of financial statements in accordance with IFRS requires the Company to make judgments, apart from those involving estimates, in applying accounting policies. The most significant judgments in applying the Company's financial statements include the assessment of the Company's ability to continue as a going concern.

Foreign currency translation

The functional currency of an entity is measured using the currency of the primary economic environment in which that entity operates. The condensed interim financial statements are presented in Canadian dollars which is the Company's functional and presentation currency.

Foreign currency transactions are translated into functional currency using the exchange rates prevailing at the date of the transaction. Foreign currency monetary items are translated at the period-end exchange rate. Non-monetary items measured at historical cost continue to be carried at the exchange rate at the date of the transaction. Non-monetary items measured at fair value are reported at the exchange rate at the date when fair values were determined.

Foreign currency translation (continued)

Exchange differences arising on the translation of monetary items or on settlement of monetary items are recognized in profit or loss in the statement of comprehensive loss in the period in which they arise, except where deferred in equity as a qualifying cash flow or net investment hedge.

Exchange differences arising on the translation of non-monetary items are recognized in other comprehensive income in the statement of comprehensive loss to the extent that gains and losses arising on those non-monetary items are also recognized in other comprehensive income. Where the non-monetary gain or loss is recognized in profit or loss, the exchange component is also recognized in profit or loss.

Share-based payments

Share-based payments to employees are measured at the fair value of the instruments issued and amortized over the vesting periods. Share-based payments to non-employees are measured at the fair value of goods or services received or the fair value of the equity instruments issued, if it is determined the fair value of the goods or services cannot be reliably measured and are recorded at the date the goods or services are received. The corresponding amount is recorded to contributed surplus. The fair value of options is determined using the Black-Scholes Option Pricing Model. The number of shares and options expected to vest is reviewed and adjusted at the end of each reporting period such that the amount recognized for services received as consideration for the equity instruments granted shall be based on the number of equity instruments that eventually vest.

Warrants

When the Company issues units that are comprised of a combination of shares and warrants, the value is assigned to shares and warrants based on their relative fair values. The fair value of the shares is determined by the closing price on the date of the transaction and the fair value of the warrants is determined based on the Black-Scholes Option Pricing Model.

Loss per share

Basic loss per share is calculated by dividing the loss attributable to common shareholders by the weighted average number of common shares outstanding in the period. For all periods presented, basic loss per share equals the dilutive loss per share. Diluted loss per share is calculated by using the treasury stock method. Under the treasury stock method, the weighted average number of common shares outstanding for the calculation of diluted loss per share assumes that the proceeds to be received on the exercise of dilutive share options and warrants are used to repurchase common shares at the average market price during the period.

Impairment of assets

The carrying amounts of the Company's assets are reviewed at each reporting date to determine whether there is any indication of impairment. If such indication exists, the recoverable amount of the asset is estimated in order to determine the extent of the impairment loss. An impairment loss is recognized whenever the carrying amount of an asset or its cash-generating unit exceeds its recoverable amount. Impairment losses are recognized in the statement of comprehensive income (loss).

The recoverable amount of an asset is the greater of its fair value less cost to sell and value in use. In assessing value in use, the estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects the current market assessments of the time value of money and the risks specific to the asset. For an asset that does not generate cash inflows largely independent of those from other assets, the recoverable amount is determined for the cash-generating unit to which the asset belongs.

Impairment of assets (continued)

An impairment loss is only reversed if there is an indication that the impairment loss may no longer exist and there has been a change in the estimates used to determine the recoverable amount, however, not to an amount higher than the carrying amount that would have been determined had no impairment loss been recognized in previous periods.

Assets that have an indefinite useful life are not subject to amortization and are tested annually for impairment.

Income taxes

Current income tax:

Current income tax assets and liabilities for the current period are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted, at the reporting date, in the countries where the Company operates and generates taxable income.

Current income tax relating to items recognized directly in other comprehensive income or equity is recognized in other comprehensive income or equity and not in profit or loss. Management periodically evaluates positions taken in the tax returns with respect to situations in which applicable tax regulations are subject to interpretation and establishes provisions where appropriate.

Deferred income tax:

Deferred income tax is provided using the asset and liability method on temporary differences at the reporting date between the tax bases of assets and liabilities and their carrying amounts for financial reporting purposes.

The carrying amount of deferred income tax assets is reviewed at the end of each reporting period and recognized only to the extent that it is probable that sufficient taxable profit will be available to allow all or part of the deferred income tax asset to be utilized.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply to the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

Deferred income tax assets and deferred income tax liabilities are offset only if a legally enforceable right exists to set off current tax assets against current income tax liabilities and the deferred income taxes relate to the same taxable entity and the same taxation authority.

Restoration and environmental obligations

The Company recognizes liabilities for statutory, contractual, constructive or legal obligations associated with the retirement of long-term assets, when those obligations result from the acquisition, construction, development or normal operation of the assets. The net present value of future restoration cost estimates arising from the decommissioning of plant and other site preparation work is capitalized to exploration and evaluation assets along with a corresponding increase in the restoration provision in the period incurred. Discount rates using a pre-tax rate that reflect the time value of money are used to calculate the net present value. The restoration asset will be depreciated on the same basis as other mining assets.

The Company's estimates of restoration costs could change as a result of changes in regulatory requirements. These changes are recorded directly to mining assets with a corresponding entry to the restoration provision. The Company's estimates are reviewed annually for changes in regulatory requirements, discount rates, effects of inflation and changes in estimates.

Restoration and environmental obligations (continued)

Changes in the net present value, excluding changes in the Company's estimates of reclamation costs, are charged to profit or loss for the period. The net present value of restoration costs arising from subsequent site damage that is incurred on an ongoing basis during production are charged to profit or loss in the period incurred.

The costs of restoration projects that were included in the provision are recorded against the provision as incurred. The costs to prevent and control environmental impacts at specific properties are capitalized in accordance with the Company's accounting policy for resource property interest.

The Company has no restoration, rehabilitation and environmental obligations.

Newly adopted accounting standards

Financial instruments

The Company has adopted all of the requirements of IFRS 9 *Financial Instruments* ("IFRS 9"). IFRS 9 replaces IAS 39 *Financial Instruments: Recognition and Measurement* ("IAS 39"). IFRS 9 utilizes a revised model for recognition and measurement of financial instruments and a single, forward-looking "expected loss" impairment model. Most of the requirements in IAS 39 for classification and measurement of financial liabilities were carried forward in IFRS 9, so the Company's accounting policy with respect to financial liabilities is unchanged.

As a result of the adoption of IFRS 9, management has changed its accounting policy for financial assets prospectively, for assets that continued to be recognized at the date of initial application. The change did not impact the carrying value of any financial assets or financial liabilities on the transition date.

The following is the Company's new accounting policy for financial instruments under IFRS 9.

Classification

The Company classifies its financial instruments in the following categories: at fair value through profit or loss ("FVTPL"), at fair value through other comprehensive income (loss) ("FVTOCI") or at amortized cost. The Company determines the classification of financial assets at initial recognition. The classification of debt instruments is driven by the Company's business model for managing the financial assets and their contractual cash flow characteristics. Equity instruments that are held for trading are classified as FVTPL. For other equity instruments, on the day of acquisition the Company can make an irrevocable election (on an instrument-by-instrument basis) to designate them as at FVTOCI. Financial liabilities are measured at amortized cost, unless they are required to be measured at FVTPL (such as instruments held for trading or derivatives) or the Company has opted to measure them at FVTPL.

The Company completed a detailed assessment of its financial assets and liabilities as at August 1, 2018. The following table shows the original classification under IAS 39 and the new classification under IFRS 9:

Financial assets/liabilities	Original classification IAS 39	New classification IFRS 9
Cash	Loans and receivables	FVTPL
Accounts payable	Other financial liabilities	Amortized cost

The Company did not restate prior periods as the adoption of IFRS 9 resulted in no impact to the opening accumulated deficit on August 1, 2018.

Newly adopted accounting standards (continued)

Financial instruments (continued)

Measurement

Financial assets at FVTOCI

Elected investments in equity investments at FVTOCI are initially recognized at fair value plus transaction costs. Subsequently they are measured at fair value, with gains and losses recognized in other comprehensive income (loss).

Financial assets and liabilities at amortized cost

Financial assets and liabilities at amortized cost are initially recognized at fair value plus or minus transaction costs, respectively, and subsequently carried at amortized cost less any impairment.

Financial assets and liabilities at FVTPL

Financial assets and liabilities carried at FVTPL are initially recorded at fair value and transactions costs are expensed in the statements of income (loss) and comprehensive income (loss). Realized and unrealized gains and losses arising from changes in the fair value of the financial assets and liabilities held at FVTPL are recorded in the statements of income (loss) and comprehensive income (loss) and comprehensive income (loss).

Impairment of financial assets at amortized cost

The Company recognized a loss allowance for expected credit losses on financial assets that are measured at amortized cost.

At each reporting date, the Company measures the loss allowance for the financial asset at an amount equal to the lifetime expected credit losses if the credit risk on the financial asset has increased significantly since initial recognition. If at the reporting date, the financial asset's credit risk has not increased significantly since initial recognition, the Company measures the loss allowance for the financial asset at an amount equal to the twelve months expected credit losses. The Company shall recognize in the statements of net income (loss), as an impairment gain or loss, the amount of expected credit losses (or reversal) that is required to adjust the loss allowance at the reporting date to the amount that is required to be recognized.

Derecognition

Financial assets

The Company derecognizes financial assets only when the contractual rights to cash flows from the financial assets expire, or when it transfers the financial assets and substantially all of the associated risks and rewards of ownership to another entity. Gains and losses on derecognition are generally recognized in the statements of income (loss) and comprehensive income (loss). However, gains and losses on derecognition of financial assets classified as FVTOCI remain within accumulated other comprehensive income (loss).

Financial liabilities

The Company derecognizes financial liabilities only when its obligations under the financial liabilities are discharged, cancelled or expired. Generally, the difference between the carrying amount of the financial liability derecognized and the consideration paid and payable, including any non-cash assets transferred or liabilities assumed, is recognized in the statements of net income (loss).

Newly adopted accounting standards (continued)

Revenue from Contracts with Customers

On May 28, 2014, the IASB issued IFRS 15, *Revenue from Contracts with Customers*. The standard contains a single model that applies to contracts with customers and two approaches to recognizing revenue: at a point in time or over time. The model features a contract-based five-step analysis of transactions to determine whether, how much and when revenue is recognized. New estimates and judgmental thresholds have been introduced, which may affect the amount and/or timing of revenue recognized. The new standard is effective for fiscal years beginning on or after January 1, 2018 and is available for early adoption. The Company has determined that the adoption of IFRS 15 had no impact on its financial statements.

Leases

The Company adopted all of the requirements of IFRS 16, *Leases.* IFRS 16 establishes principles for the recognition, measurement, presentation and disclosure of leases, with the objective of ensuring that lessees and lessors provide relevant information that faithfully represents those transactions. IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently. However, lessees are no longer classifying leases as either operating leases or finance leases as it is required by IAS 17. The new standard is effective for fiscal years beginning on or after January 1, 2019 and is available for early adoption. The Company has determined that the adoption of IFRS 16 had no impact on its financial statements.

Future accounting pronouncements

There are no other IFRS or International Financial Reporting Interpretations Committee interpretation that are not yet effective that would be expected to have a material impact on the Company's financial statements.

5. Financial Risk Management and Capital Management

Financial risk management objectives and policies

The Company is exposed to various financial risks resulting from both its operations and its investments activities. The Company's management, with the Board of Directors oversight, manages financial risks. Where material, these risks will be reviewed and monitored by the Board of Directors. The Company does not enter into financial instrument agreements including derivative financial instruments for speculative purposes.

Financial risks

The Company's main financial risk exposure and its financial risk management policies are as follows:

Credit risk

Credit risk is the risk of loss associated with a counter-party's inability to fulfill its payment obligations. The credit risk is limited to the carrying value amount carried on the statement of financial position. The Company's assets most susceptible to credit risk is its cash, which is held at a Canadian chartered bank in a non-interest bearing account and government GST recoverable, which is due from the Canadian government. As such, the risk of loss on these assets is minimal.

Market risk

Market risk is the risk of uncertainty arising primarily from possible commodity market price movements and their impact on the future economic viability of the Company's projects and ability of the Company to raise capital. These market risks are evaluated by monitoring changes in key economic indicators and market information on an on-going basis and adjusting operating and exploration budgets accordingly.

5. Financial Risk Management and Capital Management (continued)

Financial risks (continued)

Fair value risk

Fair value risk is the potential for fair value fluctuations in the value of a financial instrument. The level of market risk to which the Company is exposed varies depending on market conditions, and expectations of future price and yield movements. The Company believes the carrying amounts of its financial assets and financial liabilities are a reasonable approximation of fair value.

Interest rate risk

Interest rate risk is the potential for fair value changes of a financial instrument resulting from changes in interest rates. The Company is not exposed to interest rate risk.

Liquidity risk

Liquidity risk is the risk the Company will not be able to meet its financial obligations as they fall due. The Company manages its liquidity needs by monitoring cash outflows due in day-to-day business. As at October 31, 2019, the Company had, at its disposal, \$367,765 in cash. The Company will require additional working capital to fund its operations. There is no guarantee that market conditions will be conducive to raising such additional equity capital.

Foreign currency risk

The Company is exposed to currency risk by incurring certain expenditures and holding assets denominated in currencies other than the Canadian dollar. The Company does not use derivative instruments to reduce its currency risk. Assuming all other variables remain constant, a 1% change in the Canadian dollar against the US dollar would not result in a significant change to the Company's operations.

The carrying values, which approximate fair values of the Company's financial instruments are as follows:

	C	As at ectober 31, 2019	As at July 31, 2019
Financial Assets			•
FVTPL			
Cash	\$	367,765 \$	487,006
Financial Liabilities			
Amortized cost			
Accounts payable	\$	84,223 \$	120,133

Capital Management

The Company manages its capital structure and makes adjustments to it, based on the funds available to the Company, in order to support the acquisition of new business interests to ensure it continues as a going concern. The Board of Directors does not establish quantitative return on capital criteria for management, but rather relies on the expertise of the Company's management to sustain future development of the business.

The Company defines its capital as its shareholders' equity. As at October 31, 2019, the Company's capital resources amounted to \$346,731 (July 31, 2019 - \$431,997).

The Company's capital management objectives, policies and processes have remained unchanged during the three months ended October 31, 2019. The Company is not subject to any capital requirements imposed by a lending institution.

6. Accounts Payable and Accrued Liabilities

	As at October 31, 2019	As at July 31, 2019
Accounts payable (note 7)	\$ 84,223	\$ 120,133
Accrued liabilities	10,200	10,200
	\$ 94,423	\$ 130,333

7. Related Party Transactions and Disclosures

The following transactions occurred between related parties during the three months ended October 31, 2019 and 2018:

	2019	2018
Management fees paid to a director	\$ 4,500	\$ -
Consulting fees paid to the CEO and directors	23,250	13,870
Consulting fees paid to companies controlled by directors	12,250	-
	\$ 40,000	\$ 13,870

As at October 31, 2019, \$10,087 (July 31, 2019 - \$2,255) was payable to related parties (note 6).

8. Share Capital and Reserves

Share capital

The Company's authorized share capital consists of:

- an unlimited number of common shares without par value; and
- an unlimited number of preferred shares without special rights or restrictions attached. A total of 671,844 preferred shares with a value of \$671,844 are issued and outstanding as of October 31, 2019.

There were no common and preferred shares issued during the three months ended October 31, 2019 and year ended July 31, 2019.

Basic and diluted loss per share

The calculation of basic loss per share for the three months ended October 31, 2019 was based on the loss attributable to common shareholders of \$85,266 (2018 - \$90,491) and the weighted average number of common shares outstanding of 25,133,840 (2018 - 25,133,840).

Diluted loss per share includes the effect of nil options (2018 - nil) and nil warrants (2018 - 21,845,440) as they are antidilutive.

Stock options

The Company has a stock option plan in place under which the Board of Directors may grant options to acquire common shares of the Company to qualified directors, officers, employees and other service providers. The stock options vest according to the provisions of the individual option agreements approved by the directors' resolutions and have a maximum life of ten years. The plan allows for the issuance of up to 10% of the number of issued and outstanding common shares of the Company at any time on a non-diluted basis.

There were no stock options outstanding as at October 31, 2019 and July 31, 2019.

8. Share Capital and Reserves (continued)

Warrants

The issued and outstanding warrants balance at October 31, 2019 is comprised as follows:

	Weighted average exercise price	Number of warrants
Balance, July 31, 2018	\$0.30	21,845,440

Contributed surplus

Contributed surplus includes the accumulated fair value of share-based compensation and warrants transferred from share-based payment reserve and warrant reserve upon cancellation or expiry of the stock options and warrants. A summary of the changes in the Company's contributed surplus is set out below:

	Warrant reserve (\$)	Contributed surplus (\$)
Balance, July 31, 2018	1,820,049	511,000
Expired	(1,820,049)	1,820,049
Balance, July 31, 2019 and October 31, 2019	-	2,331,049

9. Assignment Agreement

On May 31, 2017, the Company entered into a definitive agreement to acquire GTT through a reverse take-over (note 1). After the completion of this transaction, GTT will become the business of Winston. Pursuant to the agreement, the Company will issue an aggregate of 5,500,000 common shares to the existing shareholders of GTT, on a pro-rata basis, at a price of \$0.45 per share for total consideration of \$2,475,000 plus \$125,000 in cash (paid). The Company was required to complete a concurrent private placement. In connection with the same, during the year ended July 31, 2017, the Company closed a non-brokered private placement of 11,600,000 units. Completion of the transaction is subject to a number of conditions, including but not limited to satisfactory due diligence and acceptance of the Canadian Securities Exchange. This transaction was not completed.

Effective on January 10, 2018, the Company entered into an assignment and novation agreement (the "Assignment Agreement") among the Company, certain shareholders of GTT and Abattis (note 1).

Pursuant to the terms of an assignment and novation agreement, the Company assigned to Abattis all of its rights and interest under a share exchange agreement dated effective May 31, 2017, between the Company and GTT, pursuant to which the Company was granted the right to acquire GTT. On January 29, 2018, the Company's assignee, Abattis, completed its acquisition of GTT. In consideration of the assignment and upon closing of the acquisition, the Company received 15,000,000 shares from Abattis and recorded a realized gain on assignment of agreement of \$9,953,215.

9. Assignment Agreement (continued)

The table below summarizes the computation of realized gain on assignment interest:

	Amount
Consideration received	
15,000,000 common shares at \$0.70 per share	\$ 10,500,000
Less: Cash payment to GTT	125,000
Forgiveness of loan	421,785
	546,785
	\$ 9,953,215

On June 7, 2018, the Company distributed the 15,000,000 shares of Abattis to its shareholders. The decrease in fair value of the Abattis shares from January 10, 2018 to June 7, 2018 amounted to \$7,500,000, which is recorded in profit and loss. The fair value of the Abattis shares on June 7, 2018 of \$3,000,000 was recorded as a dividend paid to shareholders.

10. Subsequent Event

On December 2, 2019, the Company commenced prelegal action against an investor, David Schmidt, claiming failure to pay for a non-brokered private placement of \$40,000.
